

IDS VIDEO VERIFICATION SOLUTIONS

IDS, in partnership with Dahua are pleased to introduce HYYP mobile phone video verification App. When using a HYYP GSM module or HYYP IP module with any Dahua P2P DVR/NVR, user can receive push notification. These will give access to pre-alarm video feeds directly from the site with the touch of an icon, verifying exactly what caused the alarm.

- Using a HYYP GSM or IP module with any Dahua P2P DVR/NVR, users can now retrieve 20-seconds of video footage (10 seconds pre-alarm) by simply tapping the camera icon in the notifications screen

- To make use of these new features in the App, you need any HYYP communicator connected to your IDS alarm panel and any Dahua P2P DVR/NVR

- Easy setup – Simply scan the QR code and link alarm zones to video channels. When the alarm activates, the pre-alarm video feed will be available via the HYYP App

- No additional cabling - all linking between HYYP and the DVR/NVR is done via the server

All the following features come standard in the HYYP App:

- All in one – HYYP offer one App for controlling security, automation and now video
- Arm/disarm/stay arm
- Partition control
- Multiple site control
- Receive push notification from alarm activations
- Bypass and un-bypass zones
- Activate wired or wireless outputs, for any automation requirements
